#### What is Entrepreneurship Development?

Entrepreneurship development is the process of enhancing the entrepreneurial knowledge and skills via structured training programmes. It deals with the study of entrepreneurial behaviour, dynamics of business, and its development and expansion. The objectives of entrepreneurship development programmes are to increase the knowledge and skill of existing entrepreneurs and encourage others to become one. Ultimately, it helps in increasing the number of such individuals in an economy. Entrepreneur development focuses on training individuals who are interested in commencing their venture or expanding their existing one. Furthermore, it concentrates more on encouraging innovation and evaluating the growth potential of an enterprise. This development process helps new firms to perform better and achieve their goals and expand their businesses. As a result, the economy of a nation also improves. Moreover, it enables entrepreneurs to develop and manage their business better along with the financial insecurities associated with it. An increase in the rate of development of entrepreneurship ventures alleviates the problem of unemployment in an economy.

Intellectual Property, Gender, and Diversity

Human innovation and creativity are the engines of progress. Since the beginning of time, female and male innovators and creators from all walks of life have transformed our world through the power of their imagination and ingenuity. However, some groups remain severely under-represented in many areas of intellectual property (IP) use. Their innovative potential is underutilized at a time when we need the widest possible range of talents is needed to solve the pressing problems facing humanity.

Christu Jyothi Institute Of Technology & Science DEPARTMENT OF CIVIL Organized A Three day Workshop On “**RESEARCH PROPOSAL**” Dt.3-10-2020 & 5-10-2020. Dr. K.Manjunath, Dr.P.Rathish Kumar and Dr.G.Manohar were the Chief Guests Discussed about Importance of “**RESEARCH PROPOSAL**” In the Department. At Last The Memento Was Given To The Chief Guest. The Lecture Was attended by 71 Students and Faculty Members of all departments.

Writing the proposal of a research work in the present era is a challenging task due to the constantly evolving trends in the qualitative research design and the need to incorporate medical advances into the methodology. The proposal is a detailed plan or ‘blueprint’ for the intended study, and once it is completed, the research project should flow smoothly. Even today, many of the proposals at post-graduate evaluation committees and application proposals for funding are substandard. A search was conducted with keywords such as research proposal, writing proposal and qualitative using search engines, namely, PubMed and Google Scholar, and an attempt has been made to provide broad guidelines for writing a scientifically appropriate research proposal.
